Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 3 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Specifically, "without tools" is vague.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1, 2, and 4-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Jordan et al. (US 6264008).

Jordan et al. disclose a bicycle brake for applying a squeezing force to retard movement of a bicycle wheel comprising: a pair of opposed rods (see proximally of 30), means 32 on each rod for frictionally engaging a bicycle wheel, said frictionally engaging means movable between an open non-braking position and a closed braking position and capable of applying force to the bicycle wheel in the closed braking position, two pair of wedge members 36, 40, at least one wedge of each pair adapted to move the frictionally engaging means and each pair having contacting planar surfaces there between, said planar surfaces inclined at a non-perpendicular

Art Unit: 3683

and non-parallel angle relative to the direction of movement of the frictionally engaging means, actuating means 26 operably connected to at least one wedge of each pair of wedges whereby upon actuation of the at least one wedge in each pair relative movement occurs between the planar surfaces in turn causing linear closing movement of the frictionally engaging means and applying squeezing force on the bicycle wheel.

Re claim 2, see spring 28.

Re claims 4 and 5, see Fig. 4.

Re claim 6, see above rejection re claim 1.

Re claims 7 and 10, see Fig. 5 along the line Y.

Re claims 8 and 9, see spring 28.

Re claim 11, see Fig. 4 along line X.

Re claim 12, see Fig. 4.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Jordan et al. (US 6264008).

Jordan et al. fail to disclose removing a wedge without tools. However, the interchangeability of a slot head such as that shown along line Y in Fig. 4, with, for example, a

Art Unit: 3683

knurled head that may be turned by hand, is notorious. It would have been obvious to one of ordinary skill in the art to which the invention pertains at the time the invention was made to have interchanged the slot head of Jordan et al. with a knurled head in order to allow for road side adjustment.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Nishimura, Lumpkin et al., and Huang disclose related devices.
